

Art topic:

A new topic linked to our science - looking at the work of modern artist, **Debbie Arambula** - the heart artist. You need to research some of her work (look at what she has produced on her website) and then creating our own heart-based work. <https://www.debbiearambula.com/>

This is an opportunity for you to be creative - you need to produce a portfolio your own work in a similar way to this artist. I am well aware that you may have limited art resources at home but you could create the designs at home and then paint once we are back at school. Alternatively, you could use create collages using things around the house and garden. Please use your imagination. I know many of you are very artistic so you can adapt this work to suit your own interests. I know some of you have designed clothes in the past - why not use the heart theme in a range of clothing? If you prefer 3D work, you could make paper mache hearts and produce some model. Could you try some printing?

Some examples from Debbie's site:
