10.  $24 \div 4 =$

Answer:

## Grab Some Carrots

Grab a handful of carrots (counters or cubes). Count your carrots. Can you divide them into groups of 3, 4 and 8? Are there any carrots left over? We call this a remainder.

For example:

$11 \div 4 = 2 \text{ remainder } 3$

11 carrots shared into groups of 4 makes 2 groups with 3 carrots left over.

1.  $40 \div 5 =$

Answer:

2.  $50 \div 10 =$

Answer:

3.  $22 \div 2 =$

Answer:

4.  $24 \div 3 =$

Answer:

5.  $32 \div 4 =$

Answer

When the numbers get bigger, it takes too long to hop one group at a time so we can hop in groups of 10, 5 or 2.

Draw number lines to find the answers to these division problems.
