

We are learning about **food chains** this week.

### Tasks:

(Remember - you do not need to print the worksheets. You can record all your work straight into your book).

- Watch the Food Chains powerpoint - (on the Queensgate website), for information and for instructions for the following tasks.
- There is also a short video clip at <https://www.bbc.co.uk/bitesize/clips/z96r82p>.
- Use the picture cards in the Food Chains Sorting Activity - or draw some of your own, to -
  1. Sort the pictures into - herbivores, carnivores and omnivores,  
- producers, consumers and predators.
  2. Make as many different food chains as you can. Record some of them in your book or make a concertina booklet - by sticking the pictures in the correct order or writing lists, (sun → leaf → caterpillar).
- Using the Food Chains Activity sheets to guide you, draw and label 3 food chains with at least 3 'links' and 2 food chains with 4 'links'. Write a sentence for each to explain where you find the food chain.

### You might like to:

- Make paper chain food chains - There are printed versions on the website to give you ideas or to colour in - or you could design your own.
- Watch a video & learn a song: <https://www.youtube.com/watch?v=5Gv9yuN2Ch8>
