

## Right-angled Roads

# Right-Angled Roads

I can explore turns of a right angle in clockwise and anticlockwise directions.

Draw a line to show the route of the yellow car travelling to the toy shop. Colour in green the **clockwise** right angle turns and colour in red the **anticlockwise** right angle turns. The first two have been done for you.

Can you drive the blue car to the garage?

Can you drive the red car to the swimming pool?
