

# Science

I have found you the most amazing website where you can research from <https://spaceplace.nasa.gov/menu/solar-system/> this is designed for children and is full of facts.

This week your learning objective is to: LO; Describe the movement of the moon relative to the Earth

You can present your work in any way you choose... it could be a book, leaflet, power point- you choose.

For this week's learning you will need to research the movement of the moon relative to the earth. Here are some links to help you...

<https://www.bbc.co.uk/bitesize/clips/z3jd7ty>

There is lots of information on <https://www.discoveryeducation.co.uk/>
