15<sup>th</sup> April 2020

Dear 6TS

I hope you are all keeping well during these difficult times and have had a good Easter.

I have put together a document, which explains our learning activities for the first half of the summer term.

There are lots of links and activity ideas for English, maths, science, history and art. These suggestions follow the national curriculum and the path that we would have been following. I hope you find them useful. They involve using the Internet and various websites. However, most activities can be completed without the need to print. If there are any difficulties, please let me know and I can arrange to have some paper activities delivered to you.

Our history topic for the summer term is **Railways on the Isle of Wight**. A good place to start is by thinking about how people travelled before the railways were built. I have suggested a series of informative and interesting film clips that you might want to watch to help start you off and then use them to help you throughout the topic with the different activities.

Our science topic for the first half of the summer term is learning about the **Human Circulatory System**. A starting point would be to find out about how our hearts work and how blood travels around our bodies. Then move on to the benefits of exercise and healthy eating.

Try to set aside regular times for reading each day. You may want to do a bit of writing and maths every day or alternate between the two. It's up to you. Try, if you can, to complete at least one longer piece of writing each week as you work your way through the different activities. This could be typed or handwritten or a mixture of both. Remember to reread, edit and improve your work.

If you would like to, please feel free to send me some examples or photos of your work using the email address: [6ts@queensgateprimary.co.uk](mailto:6ts@queensgateprimary.co.uk)

Good luck with your home learning.

Miss Saddington

Working together for a successful future
