This reading task is linked to our science topic this week. It focuses on prediction. Can you work out what the missing words could be?

WHAT'S FOR DINNER?

This text describes a food chain It tells you what some animals eat. Read it carefully and try to write in the missing words.

A Food Chain

Everything that is alive needs energy. Energy comes from food. Plants make their own _____, by using the sun, air and water. Animals can't make their own food.

At the start of a food chain there is usually a plant. An animal eats the plant, then it gets eaten by a bigger _____, and so on. For example, a slug eats a _____. A hedgehog eats the _____. A fox then comes along and eats the _____. Some animals, such as cows and sheep, only eat plants. Some animals, such as lions and tigers, only eat meat. Other animals, such as human beings, eat both _____ and _____.

When you are drawing a food _____ like the picture above, remember that the arrow means:

is eaten by
