## Maths Assessment Year 3 Term 2: Geometry - Properties of Shapes

---

1. Draw 2D shapes; recognise 3D shapes in different orientations and describe them.
2. Recognise angles as a property of shape or a description of a turn.
3. Identify right angles; identify whether angles are greater than or less than a right angle.
4. Identify horizontal and vertical lines and pairs of perpendicular and parallel lines.

## Maths Assessment Year 3 Term 2: Geometry – Properties of Shapes

1. Draw 2D shapes; recognise 3D shapes in different orientations and describe them.

a) Draw a hexagon (use a ruler):

b) Draw a rectangle (use a ruler):

1 mark

1 mark

c) Name these shapes and write the correct numbers for each property in the boxes.

### Properties

Number of faces:

Number of vertices:

Number of edges:

Name of shape

1 mark

### Properties

Number of curved faces:

Number of flat faces:

Name of shape

1 mark

Total for this page

d) Complete this shape:

1 mark

e) Draw these shapes in the correct place in the Venn diagram:

2 marks

2. Recognise angles as a property of shape or a description of a turn.

a) Circle the angle that is the same as:

b) Circle the largest angle.

2 marks

Total for this page

3. Mark the right angles on these shapes. One has been done for you:

a) Mark the right angles on these shapes. One has been done for you:

b) How many right angles are there in  $\frac{3}{4}$  of a complete turn?

c) The turtle is facing West. After one right angle turn anti clockwise, where will he be facing?

He will be facing

d) Circle the angles that are smaller than a right angle.

4. Identify horizontal and vertical lines and pairs of perpendicular and parallel lines.

Use a ruler to draw lines as instructed.

a) Draw a horizontal line.

3 marks

question	answer	marks	notes
<b>1. Draw 2D shapes; recognise 3D shapes in different orientations and describe them.</b>			
a	Any 6 sided shape with straight sides.	1	Do not award marks if the child has not used a ruler.
b	A 4 sided shape with opposite sites equal and 4 right angles with straight sides.	1	Do not award marks if the child has not used a ruler. Allow a range of error for the shape. Note a square is a special type of a rectangle so can be accepted.
c	Name of shape: <b>cuboid</b> Number of faces: <b>6</b> Number of vertices: <b>8</b> Number of edges: <b>12</b>	1	Award one mark for correct name of shape and all the properties correct.
	Name of shape: <b>cone</b> Number of curved faces: <b>1</b> Number of flat faces: <b>1</b>	1	Award one mark for correct name of shape and all the properties correct.
d		1	Award one mark for a drawing that resembles the answer. The 2 corners should be close to the correct points.
e		2	Award two marks for all shapes correctly placed. Award one mark for 2 or 3 shapes correct. Allow for some errors in drawing as long as it is clear which triangles and quadrilaterals are which.
<b>2. Recognise angles as a property of shape or a description of a turn.</b>			
a		1	
b		1	
<b>3. Identify right angles; identify whether angles are greater than or less than a right angle.</b>			
a		3	Award one mark for each correctly identified right angle.  Take off one mark for each angle incorrectly ticked.  If there are more incorrect than correct answers, award 0 marks.
b	3 right angles	1	
c	South	1	
d		1	

question	answer	marks	notes
<b>4.</b> Identify horizontal and vertical lines and pairs of perpendicular and parallel lines.			
a		1	Award one mark for a line horizontal on the page. Allow a small margin of error. The line must be drawn with a ruler.
b		1	Award one mark for a line vertical on the page. Allow a small margin of error. The line must be drawn with a ruler.
c		1	Award one mark for a line parallel to the one given on the page. Allow a small margin of error. The line must be drawn with a ruler.
d		1	Award one mark for a line perpendicular to the one given on the page. Allow a small margin of error. The line must be drawn with a ruler.
e	A line shorter than the one given. 	1	Award one mark for a line shorter than the one given on the page. Allow a small margin of error. The line must be drawn with a ruler. The line does not have to be parallel.
