Step 6: Subtracting – Same Decimal Places

National Curriculum Objectives:

Mathematics Year 5: (5F10) [Solve problems involving numbers up to three decimal places](#)
Mathematics Year 5: (5M9a) [Use all four operations to solve problems involving measure \(for example length, mass, volume, money\) using decimal notation including scaling](#)

Differentiation:

Questions 1, 4 and 7 (Varied Fluency)

Developing Tick the calculations which are correct and change those which are not in 4 calculations subtracting numbers with up to two decimal places; no exchanges.

Expected Tick the calculations which are correct and change those which are not in 4 calculations subtracting numbers with up to two decimal places; with single exchanges.

Greater Depth Tick the calculations which are correct and change those which are not in 4 calculations subtracting numbers with up to two decimal places; with multiple exchanges.

Questions 2, 5 and 8 (Varied Fluency)

Developing Use the digit cards to fill in the missing numbers in two column subtractions involving numbers with up to two decimal places; no exchanges.

Expected Use the digit cards to fill in the missing numbers in two column subtractions involving numbers with up to two decimal places; with single exchanges.

Greater Depth Use the digit cards to fill in the missing numbers in two column subtractions involving numbers with up to two decimal places; with multiple exchanges.

Questions 3, 6 and 9 (Reasoning and Problem Solving)

Developing Use subtraction to find the missing numbers in 5 part whole models involving numbers with up to two decimal places; no exchanges. Use the answers to crack a code.

Expected Use subtraction to find the missing numbers in 5 part whole models numbers with up to two decimal places; with single exchanges. Use the answers to crack a code.

Subtracting – Same Decimal Places

1. Mark the calculations by ticking those that are right and correcting those that are wrong.

A. $5.95 - 3.22 = 2.73$

☐

B. $6.93 - 1.32 = 5.61$

☐

C. $2.9 - 1.8 = 1.11$

☐

D. $41.7 - 11.2 = 3.05$
