Week 4 Fluent in five and Learning for the week

Fluent in five

1)

456 divided by 4	

2)

1000 – 679 = (show as a formal calculation)

3)

64 x 34   =   show your calculation using the formal method

4)   Write the equivalents of 5 % as a fraction and as a decimal

This week's learning objective

<mark>To solve problems involving number up to three decimal places.</mark> Adding and subtracting with the same number of decimal places.

Using this link- https://whiterosemaths.com/homelearning/year-5/ work through SUMMER WEEK 2– there is a lesson to work on each day.

You need to watch the video and give it a go! (if unsure watch the video again) still unsure message me and I will support you through this.

If you are getting the questions correct then move on to the attached questions (the same structure as in class)
